

Our Hosted or Cloud PBX ensures easy deployment, up-scaling, easy-maintainable solution with features such as remote support and call recordings.

A professional and affordable solution that allows for greater productivity and customer satisfaction.

Need to add extensions due to company growth? Running a campaign for a certain period? The Hosted PBX is the perfect solution to increase inbound and outbound call capacity. Simply add an IP phone to your network and we will do the rest!

In addition to the normal features, our hosted PBX will enable you to:

- Keep track of the success of marketing campaigns
- Review productivity of different departments
- Use call recordings to improve the performance of employees
- Never miss a call with smart routing
